

Centura St. Anthony Hospital

A community of caregivers on a mission.

FACT SHEET | 2023 | centura.org

Award-winning care that heals, inspires, and connects.

Centura St. Anthony Hospital is a full-service, acute care hospital, inpatient acute rehabilitation, and Level I Trauma Center. A primary receiving center for the region's most seriously ill and injured patients, it is the original headquarters for Flight for Life® Colorado, an international model for air and ground transport services.

Founded in 1893, St. Anthony Hospital moved to its eco-conscious Lakewood campus in 2011. Today, this state-of-the-art facility, its patient-oriented processes and advanced technology support physicians and associates across multiple award-winning areas of care.

11600 W 2nd Place | Lakewood, CO 80228
720.321.0000

St. Anthony Hospital was created as a true healing environment—a place that nurtures the well-being of patients, guests and associates. In 2021, St. Anthony received the Champion Large Business Award from the West Metro Chamber for exemplifying success not only in business but in the community.

Distinctive Services

St. Anthony Hospital's innovative, high-quality care has earned it regional and national recognition.

Healthgrades Honors

In 2022, St. Anthony Hospital received 4 honors from Healthgrades, the leading online resource for comprehensive information on physicians and hospitals. The hospital merited honors for its respiratory failure, treatment of sepsis, America’s 100 Best Cardiac Care and treatment of Chronic Obstructive Pulmonary Disease.

Patient & Community Resources

St. Anthony Hospital hosts regular classes, educational sessions and support groups on campus to support area residents on their wellness journey. It also sponsors a wide range of community events in fulfillment of its mission. Among the most visible integrated resources is the St. Anthony Hospital Cardiac Rehab, Fitness & Wellness Center. This inviting center offers a wide range of clinical services for those with cardiovascular, diabetes and pulmonary diseases, as well as a full schedule of fitness classes for the community.
